

PRINCIPLES OF LEAN MANUFACTURING WITH LIVE SIMULATION

LEAN 101

Lean is defined as the systematic elimination of waste through continuous improvement. Waste impacts competitiveness, the bottom line, relationships with customers, facilities, and operations. This is entry level workshop promotes the principles of lean and supports sustainability.

LEAN 101

WORKSHOP DESCRIPTION:

This workshop provides a practical overview, real-world success stories, and the hands-on tools needed to apply Lean principles to your organization. The focus is to learn how to deploy Lean in the manufacturing work environment to yield efficiency and improvement.

Participants will learn how to define value from your customer's perspective and identify waste. They will learn about various lean concepts and be able to apply them to simple improvement projects. Individuals are guided through the transformation of an imaginary company - from a traditional manufacturing environment to a lean work environment. Four levels of simulation will be conducted with training and discussion between sessions. A high level of involvement from class attendees is required to maximize learning effectiveness.

- ✓ Reduce cycle time
- ✓ Reduce inventory
- ✓ Reduce floor space
- ✓ Improve cash flow

THIS COURSE IS DESIGNED FOR:

Company leadership, supervisors, and key line personnel

LEARNING OUTCOMES:

Upon completion of this workshop, participants will:

- Be able to implement proven and dynamic process for waste elimination that build on existing continuous improvement processes and Lean thinking
- Integrate Lean process with existing processes and programs
- Apply Lean tools to savings, value stream mapping
- Earn a Lean 101 Certification upon completion of workshop

LENGTH:

1 Day/ 8 Hours

TOPICS:

Lean 101 is a one-day workshop with live simulation that delivers an entry-level introduction into sustainability. The Live simulation process is utilized to help workshop attendees understand these areas:

LEAN FACTORY

LEVEL I

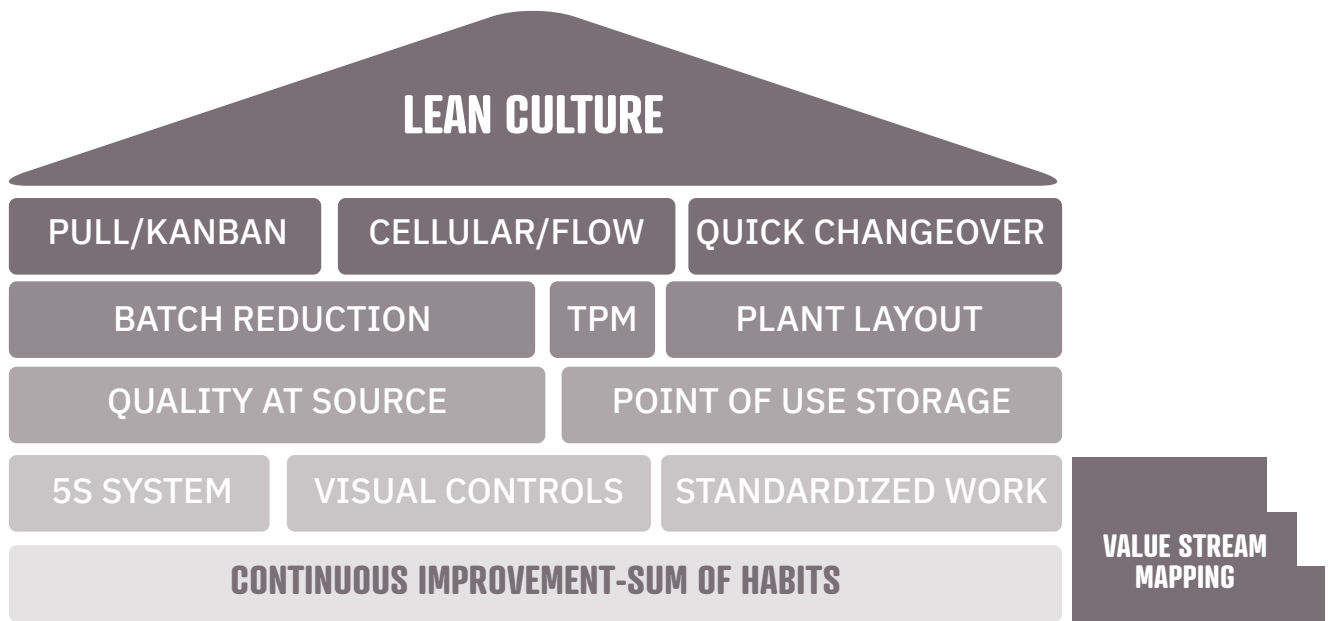

- Work teams
- Workplace Organization (5S)
- Visual Controls
- Point-Of-Use Storage (POUS)
- Layout

LEVEL II

- Quick Changeover
- Total Production Maintenance (TPM)
- Batch Size Reduction (WIP)/One-piece flow
- Quality at the Source

LEVEL III

- Pull Systems / Kanban
- Cellular Manufacturing / Flow
- Standardized Work

Impact Washington experts are ready to advance the culture of continuous learning and improvement within your organization.
